Dear Recruiter,

I am writing to express my interest in a protentional internship or a full-time job with American Express. I am primarily interested in joining as a software engineer/developer and expressed such interest at the job fair.

I am currently a senior majoring in Computer Science with a minor in Electrical Engineering. I will be graduating from Stony Brook University in May of 2019. My course work has prepared me with many of the skills I would need in the industry. I have learned the fundamentals of computer science as well as specific languages such as Java, C, JavaScript and SQL among others. I have also been exposed to scripting and using system administration tools such as network security and setting up servers.

Additionally, my past work experience has allowed me to get familiar with many of the tools used in the industry. At my past internship at National Wholesale, I learned how to use tools such as Magento, Wordpress and Lamp Servers to create and manage a website. At BRdata, I gained more exposure with regards to Windows scripting, and SQL. I worked on and eventually took lead on projects for new clients and set up new databases and installed the software. Overall, I believe my best skill is the ability to learn and adapt to the work environment and help the company in every which way I can.

I thank you for your time reading this letter, and I would welcome an interview to further discuss this opportunity. I can be reached via email jaskirat.singh.1@stonybrook.edu or cell phone (516) 300-2198. Feel free to contact me with any questions or concerns.

Best Regards,

Jaskirat Singh
